THERE ARE MANY FACTORS THAT MAY IMPACT YOUR PROPERTY'S RISK TO WILDFIRE

Check out the *FireSmart Begins at Home Guide* for an in-depth look at how you can build wildfire resiliency.

YOU ARE NOW ENTERING THE EXTENDED ZONE

10m to 30m

The goal in the Extended Zone is not to eliminate fire, but to reduce its intensity. If your property extends into this zone, a few important steps you can take include:

-  Selectively remove evergreen trees to create at least 3 metres of horizontal space between the single or grouped tree crowns.
-  Remove all branches to a height of 2 metres from the ground.
-  Regularly clean up accumulations of fallen branches, dry grass, and needles to eliminate potential surface fuels.
-  Continue to apply these principles if your property extends beyond 30m. Work with your neighbours in overlapping zones and seek guidance of a forest professional if affected by other conditions, like steep slopes.
