**THERE ARE MANY FACTORS THAT MAY IMPACT YOUR PROPERTY'S RISK TO WILDFIRE**

Check out the *FireSmart Begins at Home Guide* for an in-depth look at how you can build wildfire resiliency.

## YOU ARE NOW ENTERING THE INTERMEDIATE ZONE

1.5 m to 10 m

Elements in the Intermediate Zone are managed so they don't transmit fire to your home. Here are a few actions you can take to reduce your home's vulnerability:

- 🔥 Plant fire-resistant vegetation and select non-combustible landscaping materials.
- 🔥 Avoid incorporating any woody debris, including mulch.
- 🔥 Keep combustible items like firewood piles, construction materials, patio furniture, tools, and decorative pieces out of this zone.
- 🔥 Move trailers, recreational vehicles, storage sheds, and other combustible structures into the Extended Zone. If that is not possible, store firewood inside your mitigated garage, shed, or other ember-resistant structures.
- 🔥 Create a non-combustible ground cover, like a gravel pad, underneath and 1.5 metres around trailers, recreational vehicles, and sheds.
