THERE ARE MANY FACTORS THAT MAY IMPACT YOUR PROPERTY'S RISK TO WILDFIRE

Check out the *FireSmart Begins at Home Guide* for an in-depth look at how you can build wildfire resiliency.

YOU ARE NOW ENTERING THE IMMEDIATE ZONE

0 m to 1.5 m

The Immediate Zone is a non-combustible area that starts at the house and extends to a 1.5 metre perimeter around the home and attached structures, including decks. Reduce the chance of wind-blown embers igniting your home by starting with these proactive steps:

- 🔥 Choose non-combustible building materials when constructing or renovating your home.
- 🔥 Clear vegetation and combustible material down to mineral soil and cover with non-combustible materials like gravel, brick, or concrete.
- 🔥 Avoid planting woody shrubs or trees. If any are present, prune and maintain them regularly.
